

MUSSEL FLOATS

FLOATEX products range includes mussel floats.

Using latest technology applied in all fields of our production we are able to manufacture products with service life between two and three times longer than mussel floats manufactured with different technology.

The FLOATEX mussel floats outer shell is made in UV-stabilized linear virgin polyethylene, that is completely recyclable (Eco-friendly), and it's fully compatible with the marine environment and has a high resistance to UV rays.

The floats can be supplied empty or filled with PU in base of customer scope of work.

The float is filled with closed-cell polyurethane foam with different densities in base of the hydrostatic pressure it needs to withstand. The polyurethane foam ensure great resistance to the leakage of air or water ensuring unsinkability to the buoy also in case of accidental breaks of the outer shell. the polyurethane foam is 100% made and tested before production by our R&D laboratory.

FLOAT TYPE	SIZE		WATER DEPTH			
	O. D. (mm)	Length (mm)	0 - 10 m		10 - 20 m	
			Weight (Kg)	N.B. (Kg)	Weight (Kg)	N.B. (Kg)
